Dear Forex Shark & OriginalBP:

I have always had a fascination with technology and its infinite possibilities to improve our lives. This keen interest in technology gave me a strong drive to pursue a career in IT, which led me to earning a certification as a Blockchain Engineer. I thoroughly believe that the future is in web development. I love to see applications come to life. My experience with your DeFi products is this- I've been invested in Drip since August 2021, then REV and the animal farm. I share in your belief to change the face of finance and the desire to add value to the space. I look forward to being a part of it.

Attached is a copy of my resume with hopes that you will find my qualifications of interest. Thank you in advance for your consideration. I look forward to hearing from you.

Sincerely,

Drac
